

# Hunter Electric

## EF50, EF60, EF72

Experience the enchanting ambiance of the Hunter Electric inset electric fireplace, featuring innovative 3D LED flame-effect technology to give a realistic flame picture. Immerse yourself in its captivating log fuel bed, complete with glowing ember bed and seven distinct colour options for a customisable aesthetic. The Hunter Electric effortlessly heats your space with a 2kW output, ensuring optimal comfort and is available in three different sizes to fit your space.

- Heat output up to 2kw
- Install as a one, two, or three sided fire
- Control via remote or app
- Touch sensitive remote control with adjustable colour ring technology
- 3-way LED lighting system all with full spectrum of colours
- Adjustable flame colour & brightness
- Adjustable ambient light colour & brightness
- Realistic Ember bed with Crystal media & driftwood log set
- Highly efficient energy usage

hunterelectric  
COLLECTION

Seamlessly control your atmosphere with the wireless remote control, which allows for the dimming and brightening of the flame effect along with control of the heat settings. This feature also allows for manipulation of the flame effect and colour settings for both the flames and the ember bed, making the fire completely customisable to your taste.
